

Companies: the Blockchain conference, 80 mln collected in investments

30/01/2018-1918

The Monaco Growth Forums of Milan

(Il Sole 24 Ore Radiocor Plus) - Milan, 30 Jan - Blockchain technology and its applications in a broad range of fields* even beyond the sphere of digital currencies, is generating exponential interest among investors. Seven innovative companies have exploited this interest (Swarm Fund, CryoGen, HydroMiner, OSA Hybrid Platform, The Divi Project, MGF, CoinBoost and CastaDiva Group), meeting with one hundred investors from 15 different countries during the 13th edition of the Monaco Growth Forums (MGF), collecting funds for a total of approximately **80** million Euros. The companies have studied various applications of blockchain. For example, HydroMiner uses hydroelectric energy to efficiently and profitably extract cryptocurrencies, Osa uses the artificial intelligence-based technology to optimise shelf supplies of retailers, and Swarm Fund uses it in the private equity sector. The Monaco Growth Forums, part of the Casta Diva Group, encourages meetings between high growth potential companies and institutional investors from all around the world, and is dedicated to the blockchain theme.
